

Unified Document Management Solution Seminar

Title : Unified Document Management Seminar 2004.

Date : 7th October 2004.

Venue : APIIT Corporate Training, Technology Park Malaysia.

Our seminar series on Unified Document Management System (UDMS) has been a terrific success. We've had excellent response, and without exception, our delegates expressed appreciation for the seminar and the quality of information delivered.

One of the key highlights of the seminar series is a live demonstration of the UDMS system in action. Using it, the delegates are able to see the power of high speed scanners such as the Canon DR6080 and DR 9080 scanner's ability to provide high-speed scanning to convert physical documents to electronic format. Our delegates clearly understand the future cost savings in making today's Unified Document Management System a reality in their organization. This is a technology long overdue in Malaysia.

Thanks and we all look forward to seeing you at our next seminar.
